

Hydrogen Booster Clean EGAS Fuel Cell

(Made out of a clear water filter canister, with no filter)

Installing a Hydrogen Booster under your hood, will get you 10% to 25% , or even higher % : better gas mileage. It will clean up your emissions. You can pass the SMOG test, even if you removed the Catallac converter. You will have more horsepower. Hydrogen and Oxygen (egas-electrolysis gas) combine with either gasoline or diesel will act like a catalysist to the fuel . Will clean your fuel injectors and engine and all carbon deposits on your pistons and rings and exhaust manifold will disappear after time. You will learn about clean burning hydrogen. Clean Hydrogen from Water, not dirty hydrgen from hydrocarbons.
